-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, lines 14 & 15, the term "the edge intensity" lacks proper antecedent basis.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 & 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ng.

Re claims 1-2 & 4, Ng discloses (column 7, lines 3-50) an image processing method in which a binarization threshold for halftone processing is selected on the basis of a pixel density

Art Unit: 2624

gradient (i.e. a difference value between neighboring pixels).

If this density gradient is sufficient to indicate the presence of an edge; a matrix containing one set of threshold values is selected; if not, then another matrix containing a different set of threshold values is selected.

Allowable Subject Matter

3. Claim 3, insofar as it is understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Re claim 3, the art of record does not teach or suggest the recited inverse (one increases as the other decreases) relationship between a halftone binarization threshold and an edge intensity value.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Shively (column 21, lines 33-44) discloses a pixel thresholding arrangement in which thresholds are selected in accordance with edge detection.
